## **MonaLisa Touch: fast, simple and safe**

A Novel Procedure Patients Call "Life-Changing"

### **What is MonaLisa Touch?**

MonaLisa Touch is a CO2 fractional laser device that delivers gentle laser energy to the inner and outer vaginal tissue. The energy stimulates cell turnover and the development of new collagen, a skin-strengthening compound, to restore health in your vagina. The procedure is noninvasive, nonsurgical, and doesn't require anesthesia. It's performed right in the comfort of the doctor's office.

### **Who is a candidate for MonaLisa Touch?**

MonaLisa Touch is a superior treatment for menopausal women experiencing vaginal symptoms due to decreased levels of estrogen. Women who are in the postnatal period or recovering from cancer treatment may also benefit.

### **MonaLisa Touch can resolve:**

- Vaginal dryness
- Mild urinary incontinence due to vaginal atrophy
- Vaginal burning
- .Decreased vaginal lubrication during sexual activity
- Discomfort with intercourse
- Genital itching
- Light bleeding after intercourse
- Vaginal discharge
- Shortening and tightening of the vaginal canal

Talk to Dr. Broad about your symptoms and concerns. She can help you determine if MonaLisa Touch is the right course of treatment to bring your relief.

**\$600 cost per session – multiple sessions required**
